Application/Control Number: 10/510,949 Page 2

Art Unit: 3617

## **DETAILED ACTION**

1. Claims 1-19 are in the application.

## **Drawings**

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the clamp of claim 4 and the lock of claim 15 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3617

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3, 4, 15, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, lines 3 and 4, the recitation "a plurality of supports (5) extending in an outward radial direction with respect to said cylindrical portion" is repetitive of the recitation in claim 1, lines 6,

The nature of the clamp of claim 4 and the lock of claim 15 is not clear.

In claim 16, lines 2, 3, the recitation of a plurality of receiving members and a plurality of containers is repetitive of the recitations in claim 1, lines 4, 5.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-5 and 8-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chester et al.

Chester et al discloses a frame portion 46; a plurality of receiving members 36 attached to the frame and each adapted to receive a hollow container 30; each of the receiving members includes a plurality of supports 32 (figure 4) extending in an outward radial direction and means for attaching the frame to a dock structure. To secure the float assembly of Chester et al to the underside of a dock structure would have been an obvious matter of design choice to one having

Art Unit: 3617

ordinary skill in the art. With reference to claim 10, the adhesive used in the receiving member acts as an internal gasket; the number of supports used is deemed to have been an obvious matter of design choice to one skilled in the art.

7. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chester et al in view of Morris.

Morris discloses a floating dock element and teaches providing attaching means for connecting the floating means to a dock structure. In view of these disclosures, it would have been obvious to one having ordinary skill in the art to provide the floating dock element of Chester et al with attaching means generally as taught by Morris. The use of floatation elements connected to dock structures is well known in the art as taught by Morris. Connecting the same as taught by Morris would be an obvious expedient to one skilled in the art.

## Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huse is cited as showing a receiving element provided with radial supports.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jesús D. Sotelo whose telephone number is **571-272-6686**. The examiner can normally be reached on Mon. Fri. 5:30 AM 2:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Samuel J. Morano can be reached on 571-272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/510,949
